» MODERN, PERSONALISABLE SUPPLY AND EXHAUST AIR VALVES

# DESIGNED TO BLEND IN ENGINEERED TO STAND OUT

The design of the new air valves, LUMI and LUMO, are based on our long experience of demands in a wide range of applications. Requirements from installers and commissioners, as well as consultants, architects and users have been thoroughly investigated.

The result is a valve range that brings both fine tuned enhancements and innovative new features to the market. LUMI and LUMO are designed to look good in modern interiors – or even blend into the surroundings like a chameleon, with the personalisation option. A low noise level is also an appreciated, if not visible, feature.

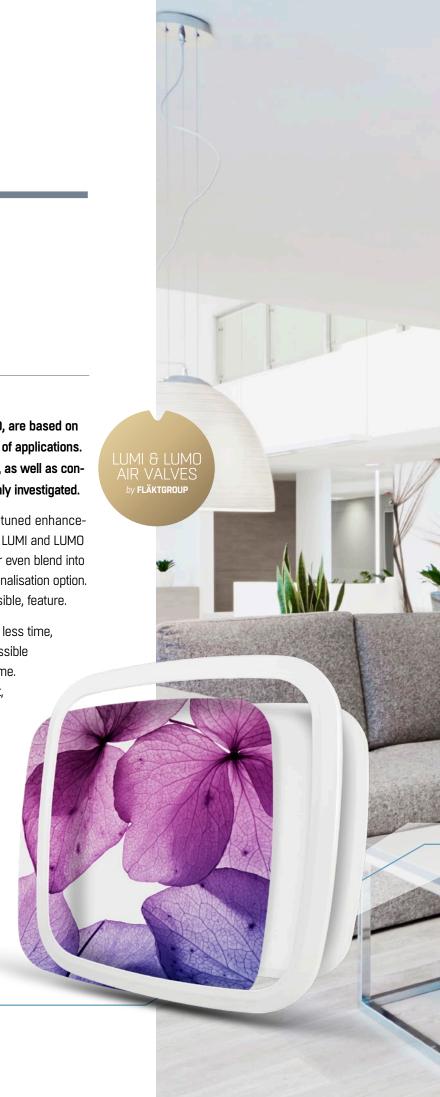

Installation is simple and commissioning requires less time, with measuring, adjustment and locking being possible without the need to remove the valve from the frame.

Measurement results are accurate and consistent, both between readings and regardless of who performs the task. Dirt repellent CleanVent® surface keeps valves clean for longer.

The wide range of sizes/variants is prepared for consultants with complete documentation and selection support.

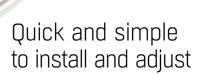

#### PERSONALISATION MADE EASY

Valves with our clever decoration frame allow users to add wallpaper, textile or their favorite picture to the front plate. No glue or tools are necessary, making it easy to change the front when redecorating. Decoration frame comes as standard with valves size 100 and 125 mm.

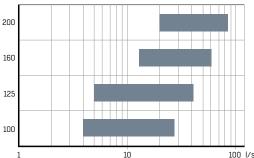

Air flow measuring, adjustment and locking can be done directly from the valve front, without removing the valve from the frame.

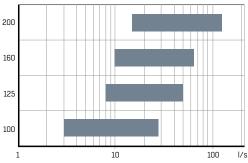

Mesurement hose attaches to spindle end for reliable and consistent readings.

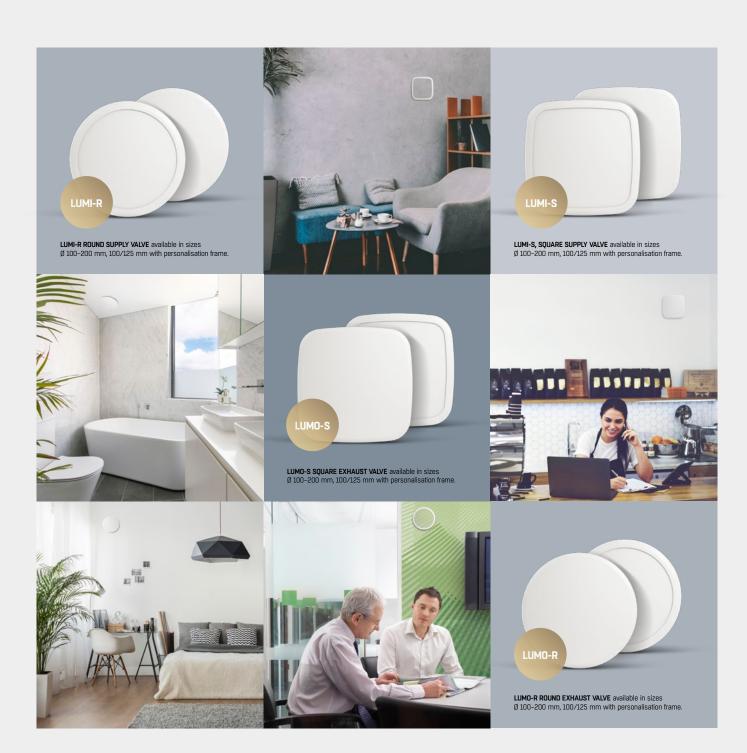

Threaded center spindle with wing nut provides precise adjustment and safe locking.

#### LUMI SUPPLY

#### **LUMO EXHAUST**

Measurement directly from the spindle gives correct readings. Precise adjustment and easy locking.

#### CONVENIENT

Measuring, adjustment and locking can be done directly from valve front, without removing the valve from the frame.

#### **DIRT RESISTANT**

CleanVent® surface treatment repells dirt. Also designed to avoid dust buildup on surrounding surfaces, which minimizes maintenance.

#### **MODERN DESIGN**

Attractive appearance with professional contemporary industrial design, fitting both traditional and modern interiors.

#### **ADAPTABLE LOOK**

Personalisation feature, where f.i. wallpaper is fixed to the valve front for a discrete appearance.

#### **USABLE**

Broad product range covers a wide application segment in both function and capacity.

## **EXCELLENCE** IN SOLUTIONS
